

As part of the career's pathway, Pine class went on a trip to the Vauxhall garage and showroom on Milton Park for an employer encounter. Pupils were shown around different departments and had the opportunity to listen to information about different job roles and ask any questions that they had.

We started at reception where the receptionist showed them the telephone and screens and explained how to take phone calls and put them through to the correct departments. Next pupils had a tour of the new cars and enjoyed seeing an electric one being charged. They met a salesperson in this area and asked some great questions about how to buy a car and the costs. We then went to the garage where a car had been lifted especially for them and pupils got to look underneath the car and they helped to align the wheels by checking when the screen was green! The tour ended with looking inside some new campervans and seeing where the cars were washed.

Overall, it was a successful trip and it really got the pupils thinking about different jobs they might like to do in the future.
