

## Year 7 Catch – up Funding 2019 - 2020

This grant is for each pupil in year 7 who does not make the expected level in the year 6 SATs tests in English or maths or both. None of the pupils at Fitzwaryn School were entered for these tests and therefore we received the full amount of £4000.

The funding was spent on phonics training for staff, more reading books in line with the phonics stages, maths mastery training and additional resources for maths teaching. The remainder was spent on providing 1:1 targeted support for pupils.

Unfortunately, due to COVID – 19, the data set is incomplete and therefore not able to be analysed to assess the percentage of pupils who made Outstanding or Good progress towards achieving their aspirational (above 75<sup>th</sup> percentile) targets.

No pupils were entered for the SATs tests and the tests did not go ahead in 2020, we are expecting to receive funding of £6000 for 2020 – 2021. This funding will be spent on further maths mastery training and training and resources for communication and reading.
